

DHRUVI SHAH

Full Stack Developer

Ahmedabad, India • +91-94288 17115 • dhruvishahh708@gmail.com

SUMMARY

Full Stack Developer with 4+ years of experience building scalable web applications using React, Python, Vue.js, and Node.js. Strong background in API integrations, database architecture, and performance optimization. Proven ability to lead cross-functional teams and deliver production-grade software solutions across automotive, healthcare, and SaaS domains.

SKILLS

React.js

Next.js

Vue.js

TypeScript

Tailwind CSS

Python

Node.js

TypeScript

Laravel

NestJS

FastAPI

REST APIs

WebSockets

PostgreSQL

MongoDB

AWS

Docker

Git

Stripe Integration

EXPERIENCE

Alternative Digital Solutions

Full Stack Developer

Apr 2025 - Present

- Engineered high-performance digital workflows for Nissan dealership operations, streamlining vehicle approval systems to improve operational efficiency by 30%.
- Developed scalable backend microservices and responsive interactive frontends utilizing Vue.js, Laravel, and NestJS.
- Reduced platform page load times by 40%, significantly enhancing core user engagement and enterprise dealership adoption rates.

BuildnBoost

Full Stack Developer

Jul 2024 - Apr 2025

- Architected scalable full-stack applications and relational database schemas to reliably handle high-volume, concurrent end-user interactions.
- Integrated secure RESTful APIs and modern JavaScript frameworks utilizing React, Node.js, and standardized authentication pipelines.
- Delivered critical features consistently ahead of schedule, expanding the client's end-to-end product delivery capacity by 20%.

TMedia Business Solutions Pvt. Ltd

Full Stack Developer

Nov 2022 - May 2024

- Led a cross-functional engineering squad in an Agile environment to build and deploy complex, highly available SaaS applications.
- Built production-grade features and robust backend services utilizing React, Python, Node.js, and PostgreSQL.
- Decreased overall production bugs by 25% through proactive QA collaboration and implementation of comprehensive automated testing standards.

Insignex

Software Engineer

Jan 2022 - Nov 2022

- Automated rigorous data extraction and communication workflows, eliminating repetitive tasks to save 15+ manual working hours weekly.
- Developed scalable automated scripts and dynamic visual dashboards utilizing Python, Django, Selenium, and Chart.js.

- Streamlined internal operations significantly through the seamless integration of automated IMAP email and attachment processing.

BrowseInfo

Jun 2021 - Oct 2021

Software Engineering Intern

- Developed a custom ERP module automating the conversion of sale orders into purchase orders, reducing manual entry errors by 30%.
- Authored efficient data processing models and workflow algorithms utilizing Python, Odoo architecture, and standard utility libraries.
- Accelerated accounting and inventory report generation, decreasing average processing time for the sales division.

PROJECTS

Nissan i-CAN

[Link](#)

Vue 3, PrimeVue, Laravel, Tailwind CSS, Pinia, AWS S3

Engineered Nissan's i-CAN digital asset management and dealership platform, building interactive workflows, role-based permission controls, and high-performance RESTful services.

Nissan Approval System

[Link](#)

Vue 3, Laravel, SSO

Architected a secure digital asset management platform featuring Single Sign-On (SSO), role-based access control, versioning, and drag-and-drop file uploads for enterprise teams.

Jugendhilfe

[Link](#)

Inertia.js, Vue 3, Laravel, Tailwind CSS, WebSockets

Developed a child and youth welfare (Jugendhilfe) management portal with Inertia.js and Vue 3 for care documentation, client case tracking, real-time updates, and digital signatures.

Dachboxit

[Link](#)

Laravel 10, PHP, Tailwind CSS, Stripe, Vite, MySQL

Developed a roof box and cargo carrier rental platform built with Laravel and Stripe integration, enabling seamless booking calendar reservations, invoice generation, and automated email workflows.

AquaNova

[Link](#)

NestJS, Next.js, React, Docker, Jest, JWT

Developed a full-stack marine management solution. Utilized Docker for containerization and integrated Swagger for API documentation. Implemented robust JWT authentication and Jest testing for maximum security and reliability.

Nissan Book a Service

Vue 3, Pinia, Bootstrap 5, Google Maps API, Vue i18n, Axios

Architected multi-region online vehicle service booking applications for Nissan dealerships across Middle East markets (Abu Dhabi, Qatar, Bahrain, Kuwait, Oman, Iraq) with localized multi-language support and interactive maps.

Lead-Flow CRM & Form Builder

Vue 3, PrimeVue, Laravel, TanStack Query, Tailwind CSS, Pinia

Built an enterprise lead-flow CRM and dynamic form builder supporting customizable field controls, validation pipelines, and automated lead routing dashboards.

AquaShift

Next.js 15, NestJS, PostgreSQL, TypeORM, Redux Toolkit, Docker

Architected a real-time marine shift management solution with Next.js 15 and NestJS, featuring TypeORM PostgreSQL database architecture, Swagger API docs, and Docker containerization.

Cloud-Based Modbus Monitoring Dashboard

Next.js, TypeScript, Python, PocketBase

Designed a real-time IoT monitoring dashboard using Next.js and Python. Engineered live data visualization, network performance analytics, and interactive map integrations.

InFiction

[Link](#)

Stripe, Twilio, AWS, React

Deployed a production-grade Web application mapping for film producers. Engineered highly scalable REST APIs, integrated Stripe payment gateways, and configured Twilio for real-time notifications.

EDUCATION

Bachelor of Engineering in Information Technology
Government Engineering College, Modasa

Jul 2017 - Jun 2021
